

# The Blowhole Project

We are a group of year 9 students from Daylesford Secondary College, for the first term we had the pleasure to go to a leadership school called The Snowy River Campus, in Marlo near Orbost.

Our project for our time at the Snowy River Campus and back at home is to clean up the area around The Blowhole, we want to make it a nicer place for everyone, whether you just want to come and have a quick look, or have a picnic and spend the whole day there. We want to make the Blowhole as clean, user friendly and sustainable as possible.

We have many plans for this area. We intend to put some bins in and have them regularly emptied by the local council. We will also install picnic tables for your use. Most importantly, we will weed the whole area and re-plant the Blowhole area with native trees and plants, as well as re-stocking the fish when there's enough water.

We have organized a community clean up day on 20th of April and we want to have all the community involved. We are having a free barbeque lunch for all participants on the day. To get this day up and running, we have had to plan extensively, raise funds and liaise with lots of local bodies. So please come along and support us on this very important day for the local community!
